

CLUB ACTIVATOR / PROGRAMMES COORDINATOR

S-Factor has an incredible team who provide training in our 3 divisions week in and week out. However, S-Factor is not just an athletics club, we are an 'academy'. This is because we provide a range of programmes – some of which we would love to reactivate.

We currently provide outreach programmes within schools and run a gifted and talented programme offering expedited pathways to athletes who show outstanding potential. We organise warm weather training during the spring – and in previous years we have incorporated educational aspects into athletics with our 'mathletics' summer programme. We also offer nutritional workshops and seminars. These and other initiatives enable us to use athletics holistically to create well-rounded children and young people. We also encourage young people to volunteer with S-Factor as part of their Duke of Edinburgh programmes and at some point become a licensed deliverer.

S-Factor is currently one of the only athletics clubs in London which delivers activities for all abilities (including our disability group) from the ages of 7yrs+. We are playing a vital role in plugging this gap.

We are seeking a Club Activator/ Programmes Coordinator to build on our existing relationships with the local authority and schools/colleges and forge new partnerships within the borough and these educational establishments to inspire pupils to get involved in athletics. This will include using external funding to create these programmes and collaborate with our affiliate organisation Arco Academy and other partners to deliver them.

Are you that person who can help to bring the above objectives to fruition?

Skills/Qualifications:

- Confident and professional
- Organised
- Ability to coordinate and manage multiple of 'matters' /projects
- Ability to liaise confidently and articulately to senior stakeholders within the borough or local schools and colleges
- Be financially literate (ability to establish and management budgets for programmes)

How much time will this take?

Perhaps a few hours a week, establishing new relationships, following up with potential partners, face to face meetings when starting new programmes, overseeing the progress of our new initiatives/ programmes.

What will I get out of it?

You will be an important representative of the club, speaking on our behalf to potential partners and stakeholders. You will be a key part of the team, reporting directly into the management committee and get a sense of reward knowing you are having a direct and meaning impact on the club's future growth and direction.
